What is elegance? A mix of grace and simplicity, of refinement and fine taste. The profound elegance, that which is sensitive to fabrics, to finishing, to the smallest details equally touches the female and male universe: the result of an attentive research, of essential, iconic pieces, for wearing on the most important occasions. The fabrics are at once solid and resilient, youthful and crisp, and are ideal to be interpreted by pieces with wide and oversize shapes and outlines: This collection declares the sophisticated essence of distinction.
